English

## Projects

### currently

<https://interior-deco-kappa.vercel.app/>

### Interior decoration website

IMy current project involves crafting an interior decoration website. Leveraging Tailwind CSS, I've embarked on creating a multi-page, responsive platform. This endeavor marks my first foray into multi-page website design and has seen me master icon generation, further refining my design skills.

### 2023

<https://tailwind-web-portfolio.vercel.app>

### Portfolio website

Creating my portfolio website was a pivotal step in my journey. I delved into advanced CSS techniques, honing my design skills independently. I mastered responsiveness, implementing crucial elements like Call To Action. Leveraging Tailwind CSS elevated my design prowess, resulting in a more streamlined and responsive website. This experience enhanced the clarity and neatness of my codebase.

### 2022

<https://feproject.vercel.app/>

### Odin Recipe project

Odin Recipes was my inaugural project, featuring a diverse collection of recipes. With detailed instructions and video demos, users could easily recreate dishes. I honed HTML skills, incorporating minimal CSS for impact. This project bolstered my confidence in tackling complex web development tasks, showcasing my commitment to user-friendly solutions in web design
